

Pulse  
in 2030

There's a few big  
fish, but a lot of  
small fish!

**We are talking about...**

How our **family and friends** use ADT in 2030

# Our Goals

- Identify **common dreams** people have for ADT
- Uncovers **shared goals**
- **Think Big** to uncover **ADT's potential**

*“Your job is to **ignore all limits** and imagine what **“could be.”**”*

# What was it like before?

*“What would we do if these **things disappeared?**”*

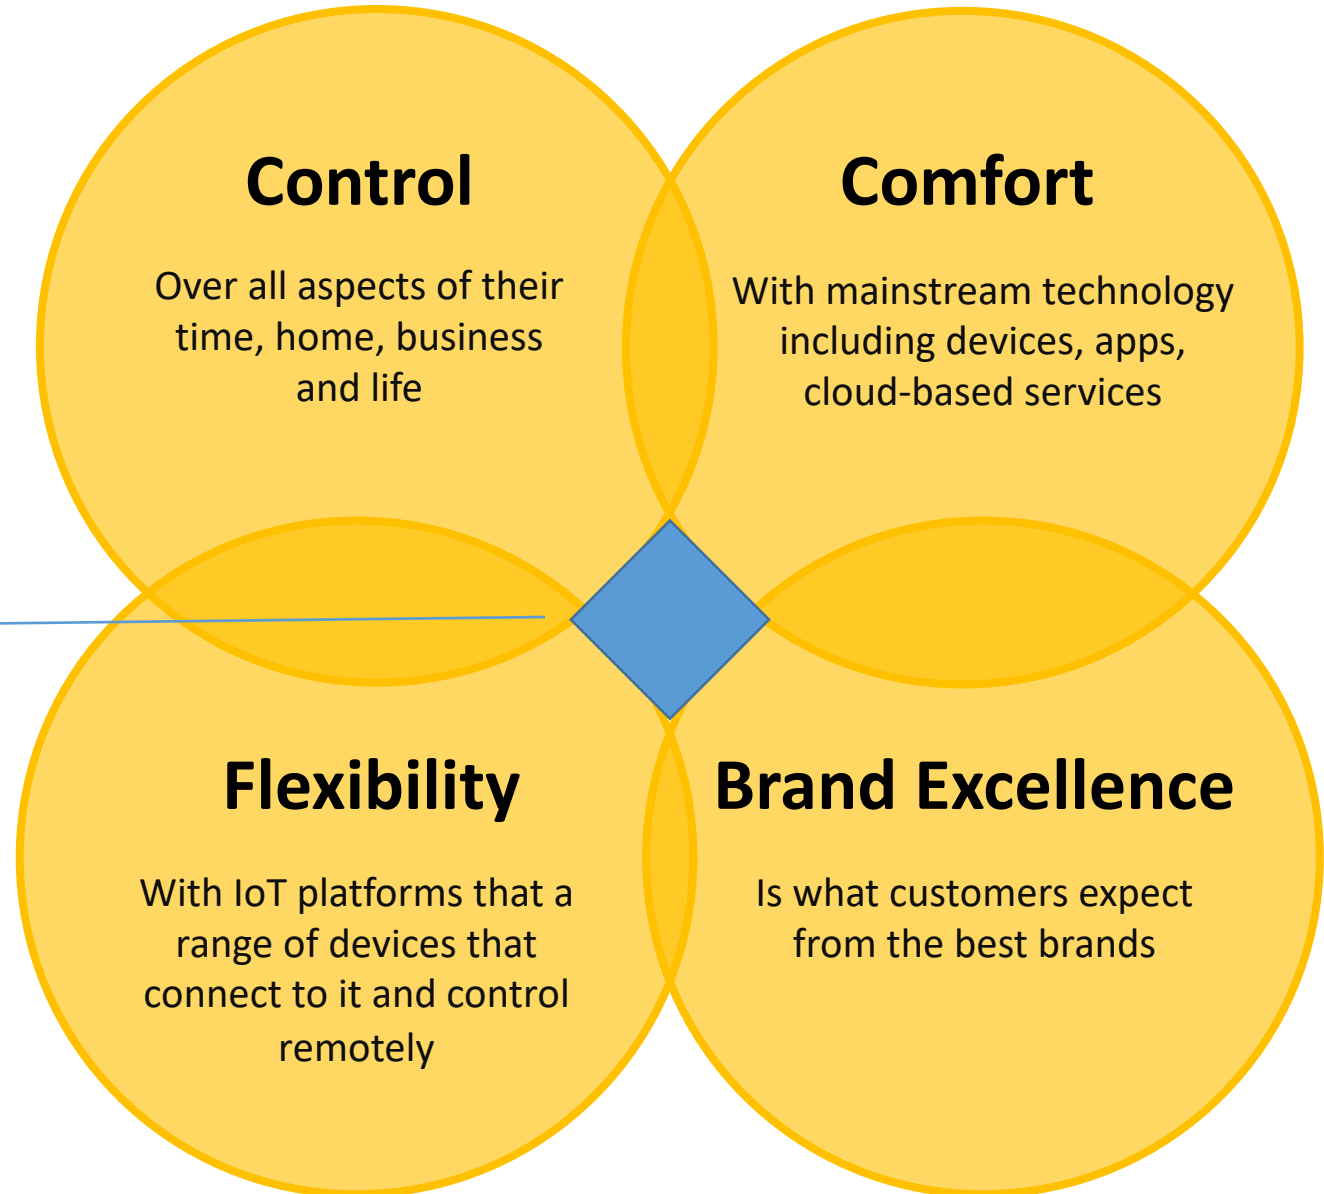

**Let's start...**

With **customer's IoT** needs

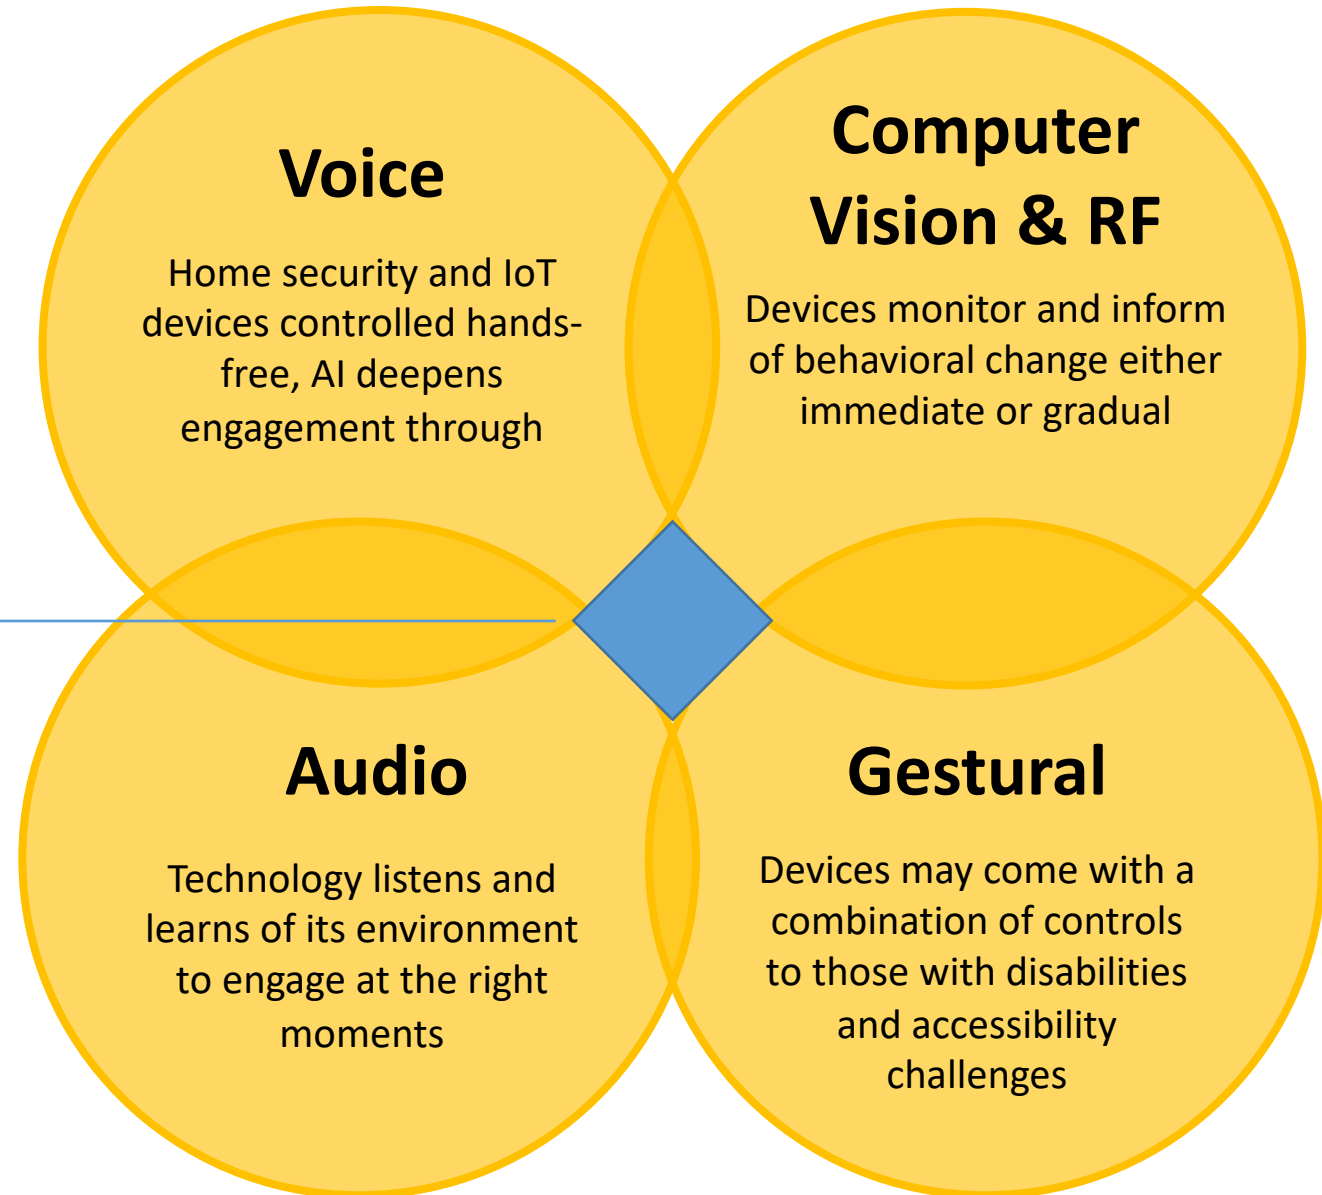

# What do customer's want?

## AMAZE CUSTOMERS

Customers want **hassle-free experiences** and products that **enrich** and **add value** to their lives

# Interaction Options

## MORE CONVENIENCE

At home, the combination of interactions **removes the “screen”** acting as the middleman so more **convenience is gained**

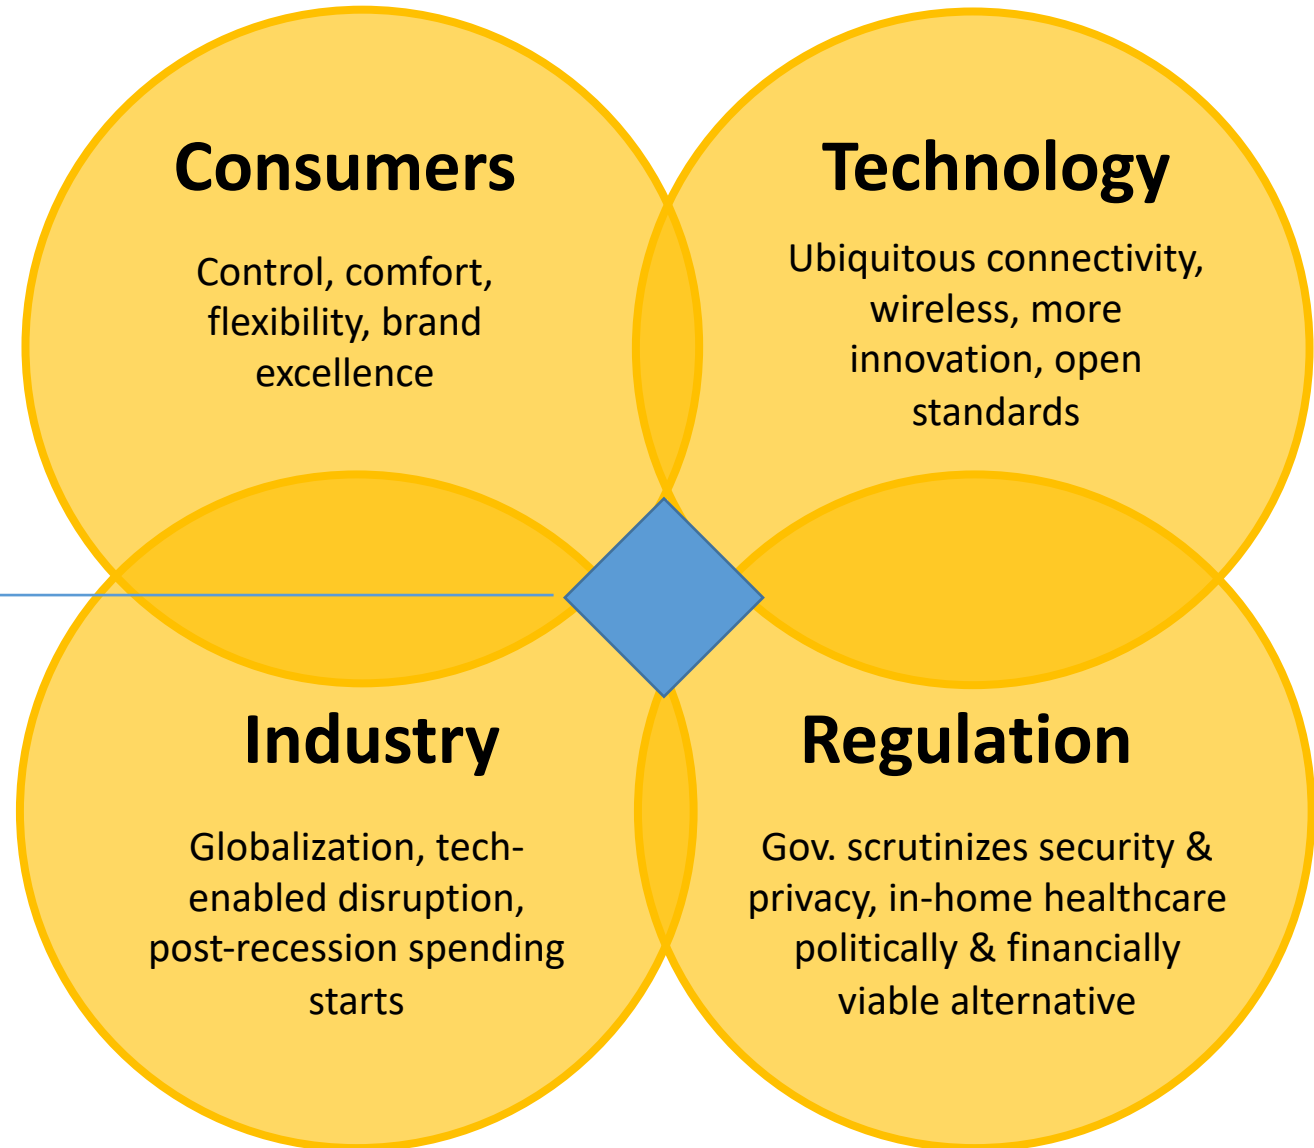

**Next...**

What is the **Connected Home**?

# Connected Home Drivers

## RULE THE WORLD

The **winner** will be the one that **connects them all or most**. Where will ADT be in 2030?

# Privacy & Security

## Risks

- Unauthorized access and **misuse of personal information**
- Facilitating **attacks on other systems**
- Privacy risks may flow from the **collection of personal information**, habits, locations, and physical conditions over time

## Benefits

- **Connected devices revolutionize** health care and medical research
- Connected devices help consumers **make better decisions**
- **Apps control platforms** an array of connected devices
- Consumers **receive incentives** from sharing data

*“Experts estimate there will **be 25 billion connected devices**, and by **2020, 50 billion**”*

**Next...**

How does the **Security Industry Evolve?**

# ADT Security Model Evolution

Today

Operator

Mainly 24/7 home monitoring, hub approach of disconnected teams, data, and functions

High human dependency to troubleshoot system, device and account problems

Automated

Hybrid of human resources and devices managing home security and functions, AI/IoT hugely disrupt traditional security, dealers transitioned out

SuperTech, skilled in IT and IP networking, replaces traditional techs and customer service agents

Responder

Devices rule, “security” shifts to first responders for cost savings and real time data improves response times

Where are the techs?

2030+

# The Responder Model - protected, connected, and fully aware

## Police, Fire, & EMT

- Decision making is made from trends & patterns, from volumes of information & multiple sources
- Personal and home security data is linked to first responders
- Home and business security cameras are accessible when needed
- Wearable technologies monitor responder and civilian bio-metrics (opt-in)
- Drone surveillance provides real-time birds-eye view

**Now what?**

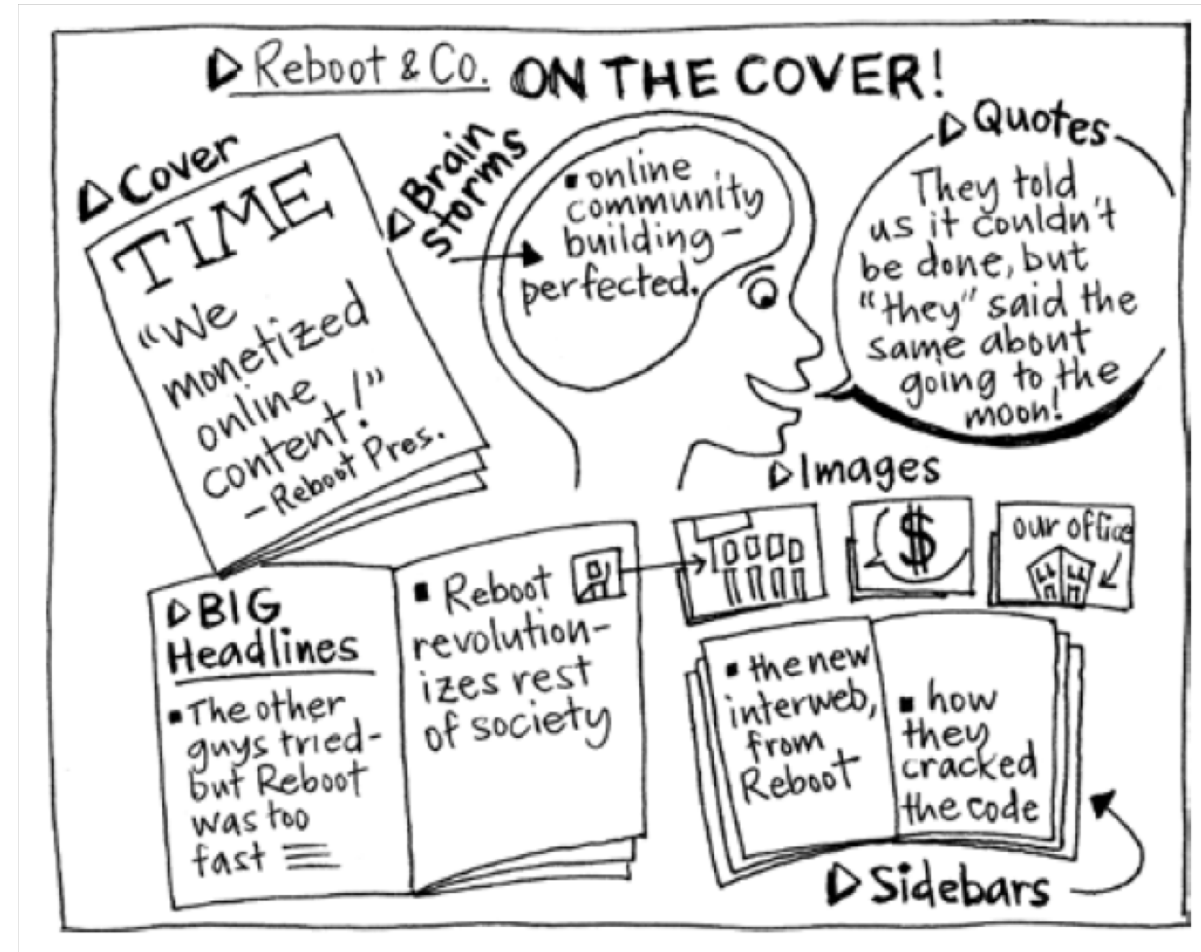

Imagine an ADT future accomplishment so **spectacular**  
it's published on **Fast Company's cover**

## Before

Brainstorm to amaze yourself

## After

Present your Spectacular solution

# Cover Story Contents

## ***Cover:***

States the spectacular success accomplished by the company

## ***Headers:***

Reveal what the story is about

## ***Sidebars:***

Include parts of the report

## ***Quotes:***

Testimonials about the accomplishment from anyone imaginable

## ***Images:***

Pictures that support the cover story

## ***Brainstorms:***

Used for writing down ideas before starting the activity

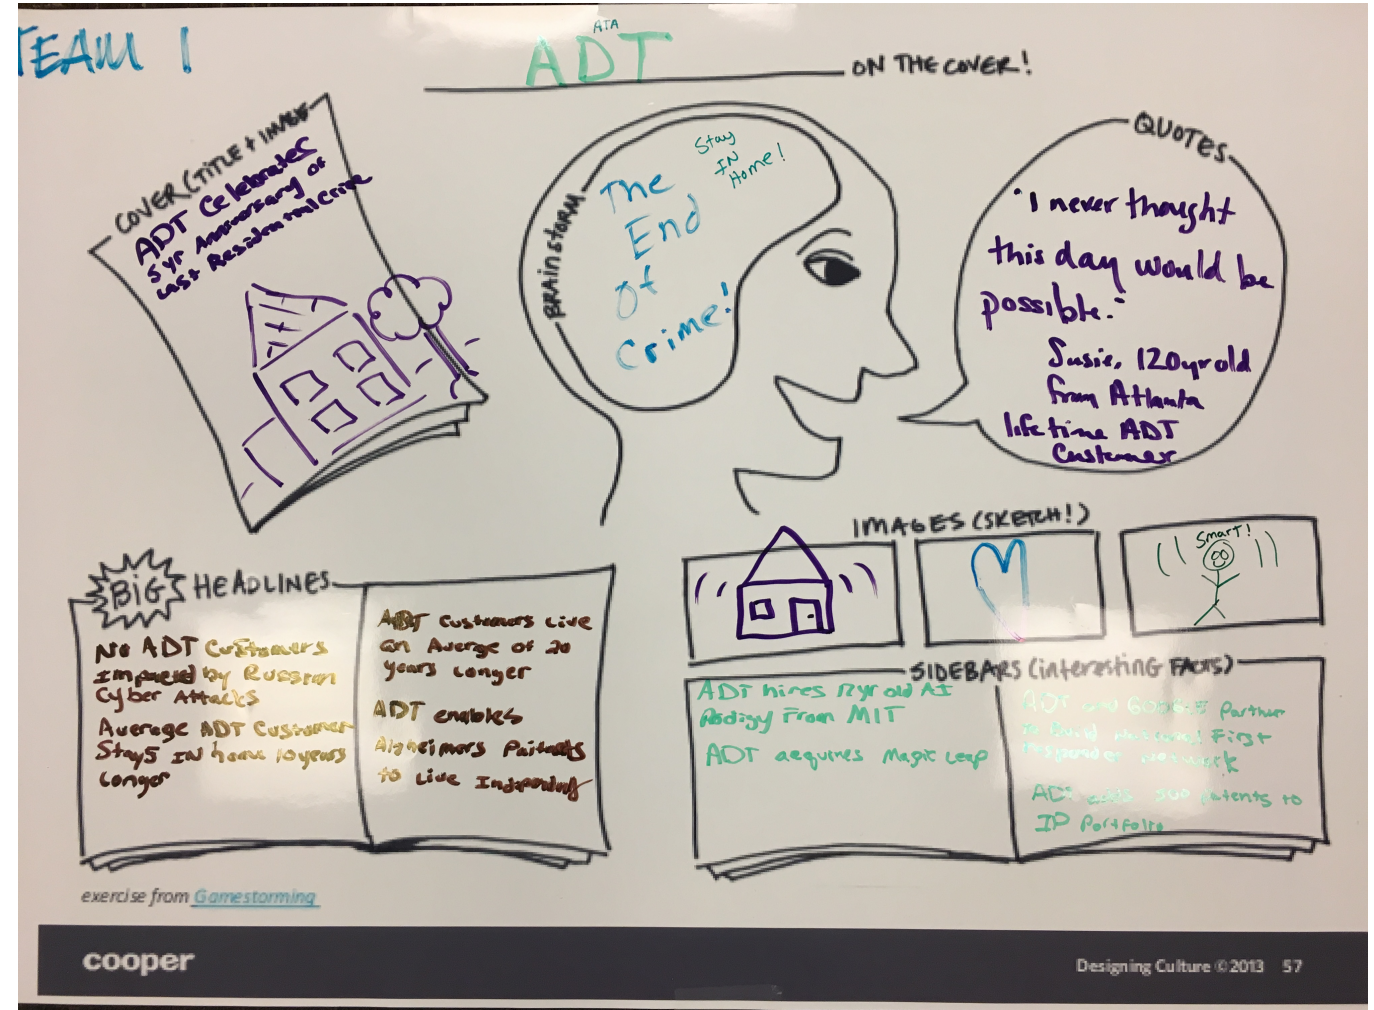

**And Now...**

The Cover Story **Results**

# “ADT Celebrates 5 year anniversary of last residential crime”

## Team 1 themes:

- Data extends life
- Residential crime is solved
- Crime shifts to cyberspace
- Rise of the first responder network
- Analytics partnerships

# “The Best Security System in the World”

Team 2 themes:

- Blend between personal and home security
- Collaborative eco-system
- “Things” know you and protect you
- Identify & facial recognition system
- Predictive analytics

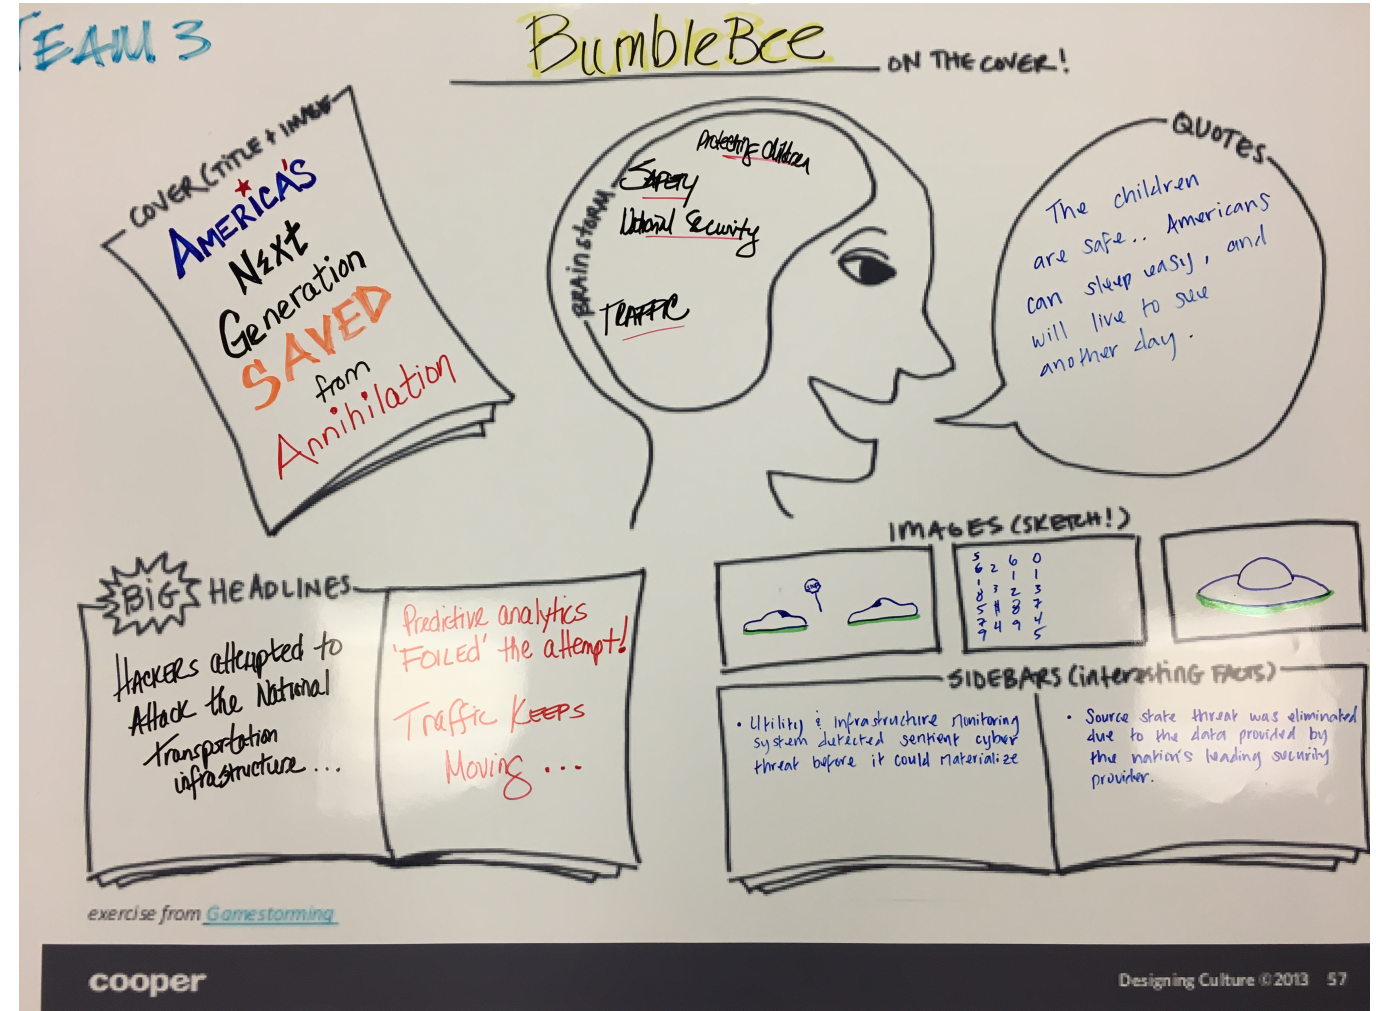

# “America’s Next Generation Saved from Annihilation ”

Team 3 themes:

- Monitoring expands from physical to digital
- Viable commercial grid product – Smart Grid
- Big investment in data
- Predictive analytics

# “From Pentagon to Octagon”

Team 4 themes:

- AI & big data solve false alarms
- Crime Prediction and Prevention
- Human error and abuse prevention by law enforcement
- Situational Awareness
- Reemployment of Customer Agents as First Responders
- Permission based data access
- Where are techs in this new world?

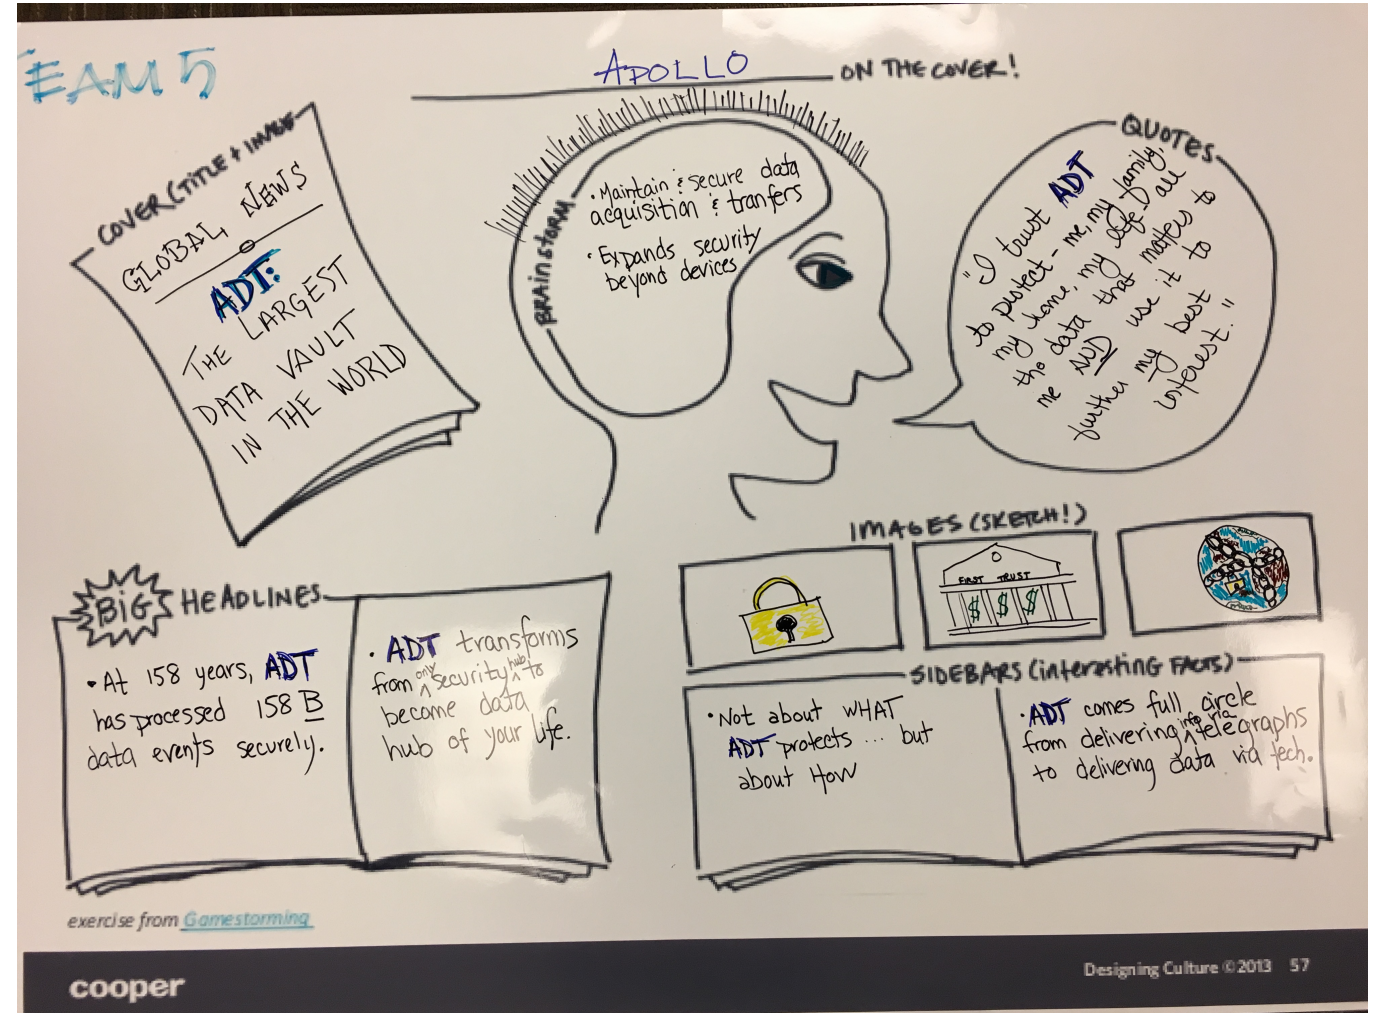

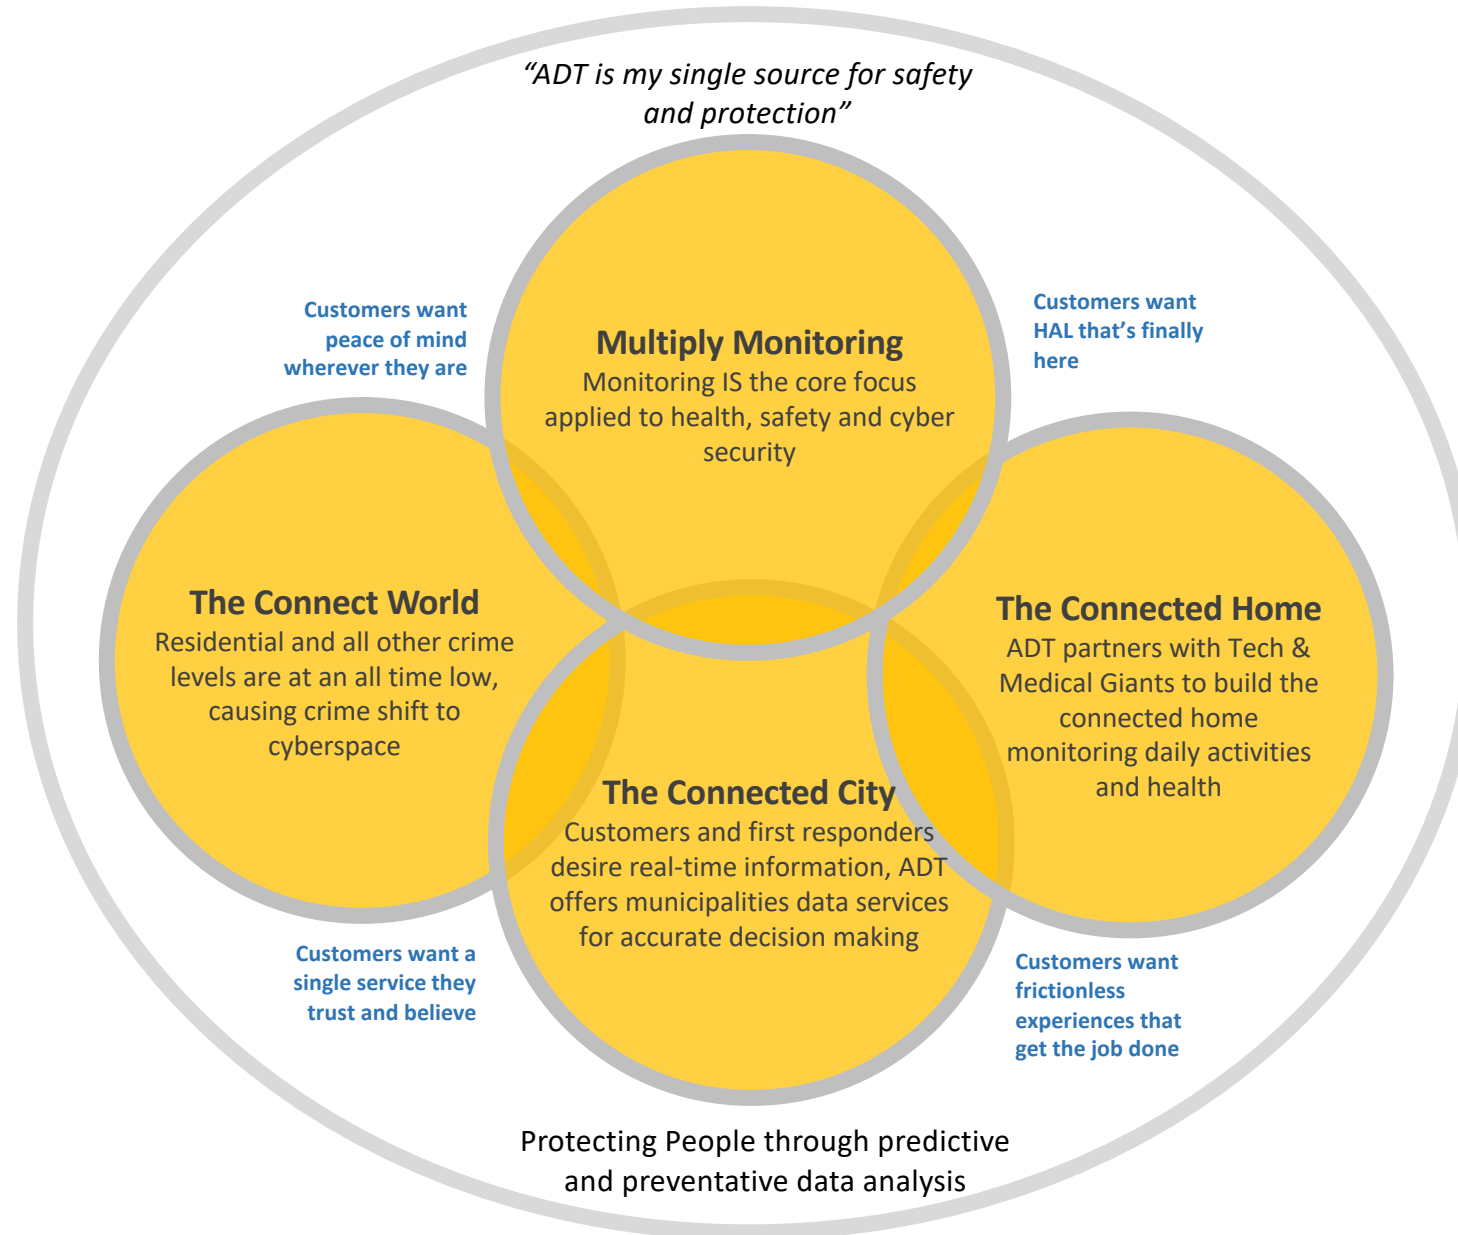

# “Global News: ADT, The Largest Data Vault in the World”

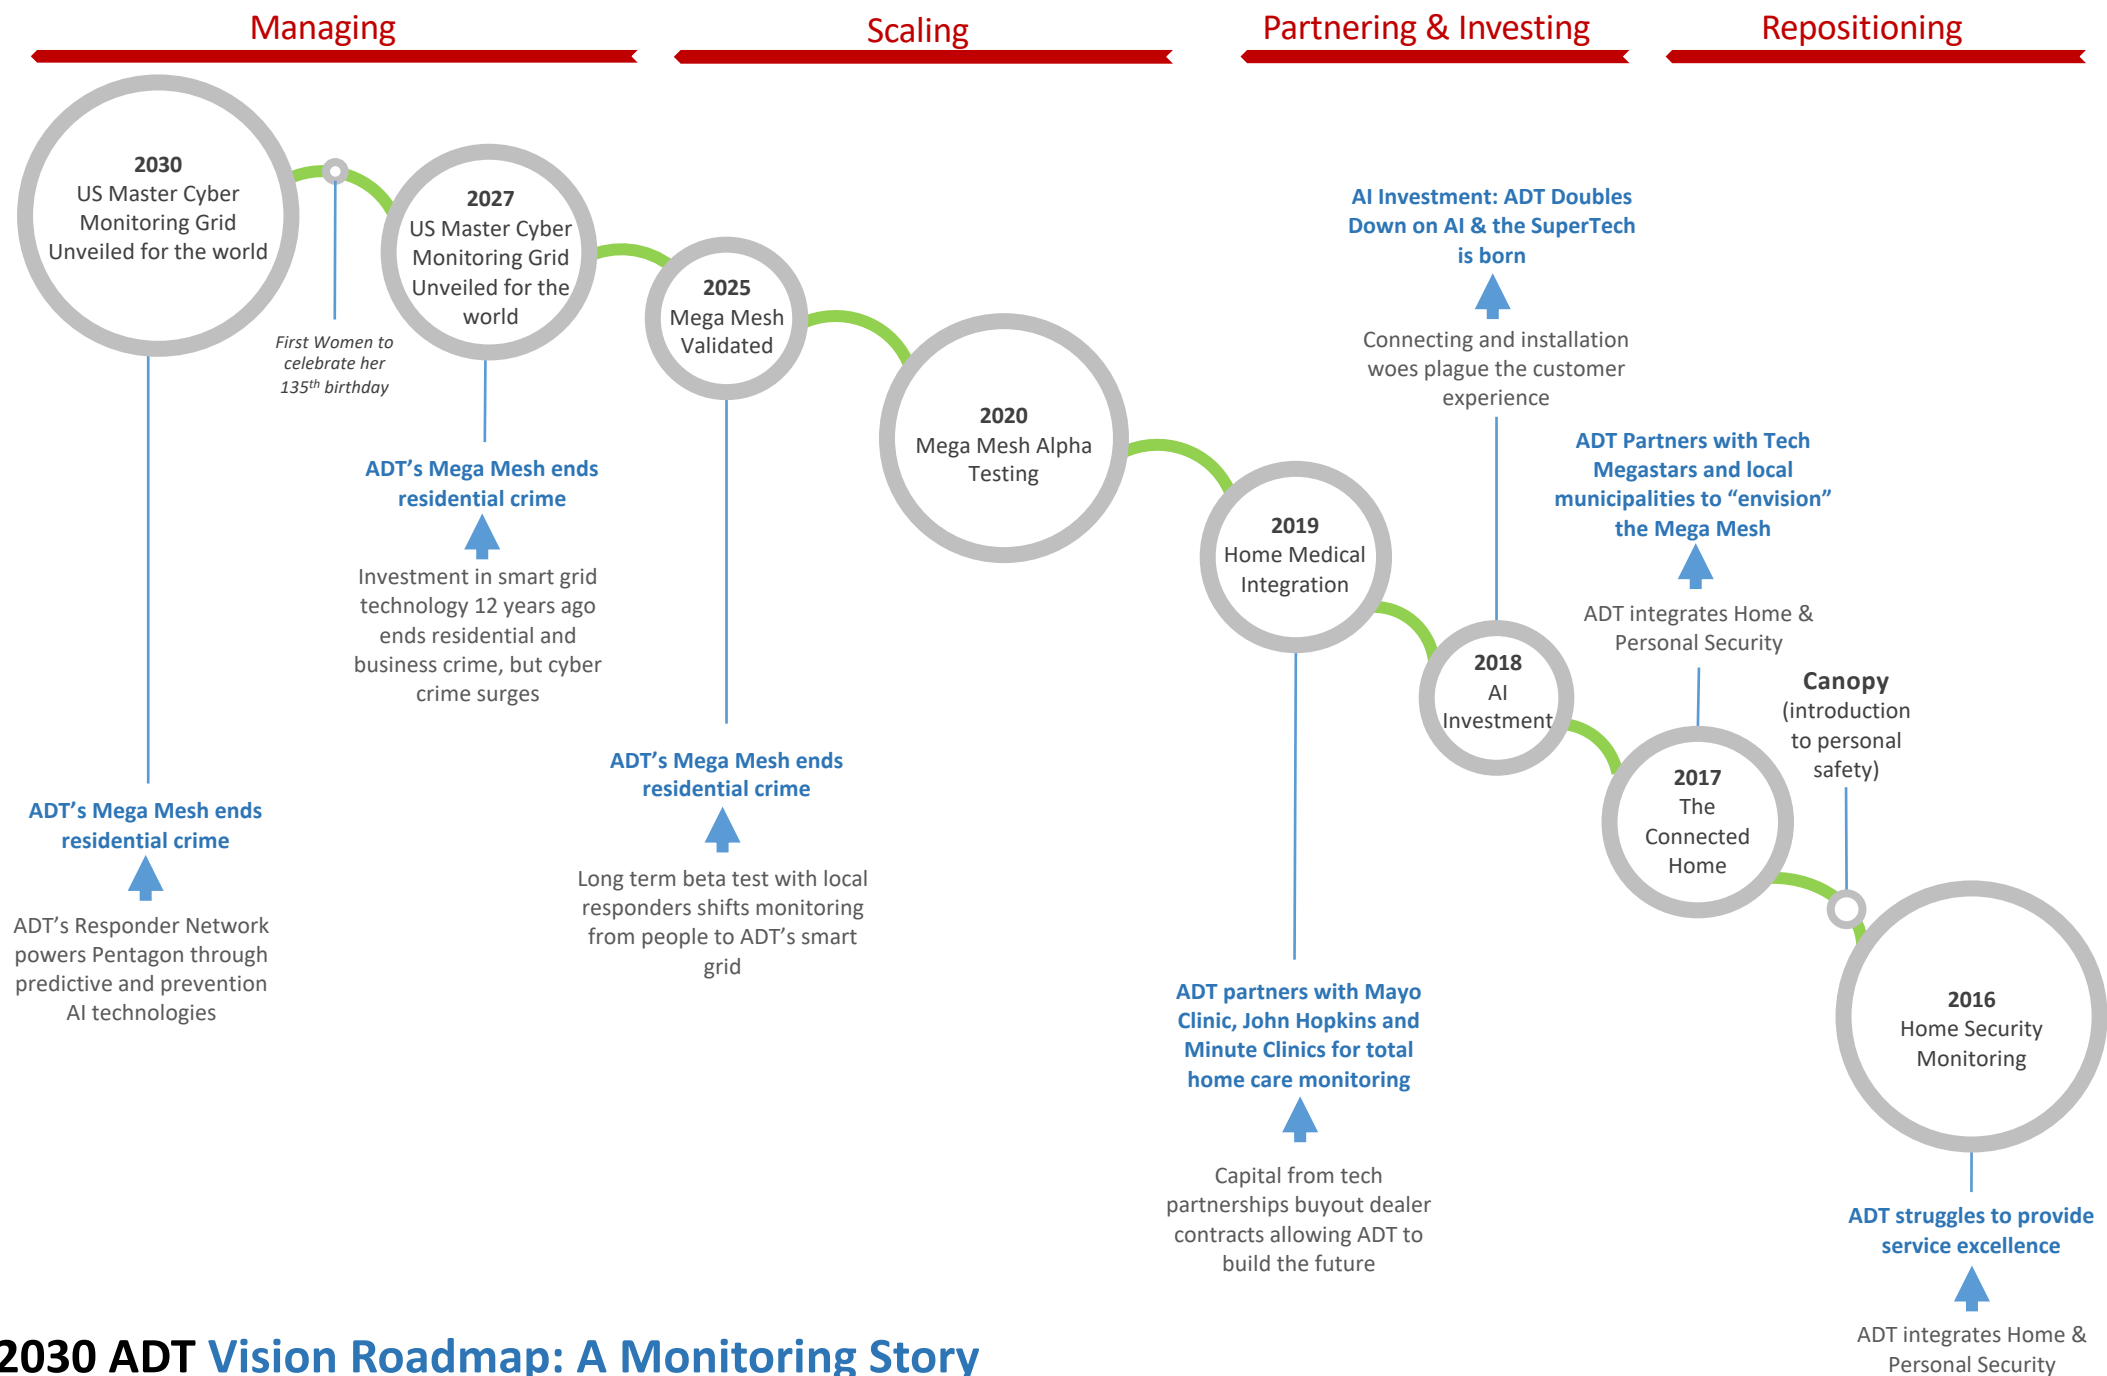

Team 5 themes:

- Situational awareness
- Data delivered to first responders (a true response system)
- Data is better than traditional model
- Security expanded beyond devices
- It's not what ADT protects, it's how
